

Educational Fume Extraction

Complete Fan Kit

A complete custom made fan pack including all the necessary components to simplify the installation of a laboratory fume cupboard ventilation system.

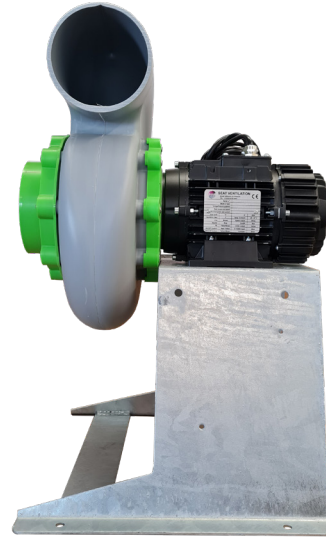

The Educational Fan Pack

Efficient fume cupboards are fundamental systems for schools, colleges and universities protecting students and staff from hazardous fumes.

The Educational Fan Pack contains the fume extraction fan suited to your operating duty in addition to all the other necessary components for a simple build that is more cost-effective than buying the fan and components separately.

“ Everything You Need For Fume Cupboard Installations.”

Options for your application

Electrical options:

- 230V 1~ motor. EC Available
- 230/400V 3~ direct-on-line or inverter supplied motor. EC Available.
- 400/690V 3~ motors in larger sizes
- Pre-wired electrical isolators
- Motor starters
- Inverter drives
- Airflow controllers
- ATEX motors

Mechanical options:

- Multiple handing options
- Metal or weather proof box pedestal
- Anti-vibration mountings
- Flexible connectors
- Flange pairs
- Manual dampers
- Drain hose connectors
- ATEX polypropylene/carbon fans

Technical Expertise

We have over 25 years' of experience in corrosive air movement and explosive environments. Our team of sales engineers are industry experts.

Stock Availability

Our customers benefit from short lead times and unrivalled stock availability on an extensive range of fume fans. We're confident that our stock and logistics policy enables us to maintain a position that will provide continuity of business and a cost effective solution to industrial corrosion resistant fan procurement.

Our Aims

Our aim is to reduce installation time and costs for the installer. Providing a complete fan kit saves time individually sourcing accessories & ancillaries. Our tailored package is better value than buying the fan & accessories separately.

Customise Your Fan Pack

We will customise your complete fume extraction fan kit by discussing the available space, current set up, mounting options and operating and duty points of your fume cupboard to determine the exact contents of your complete kit. We'll then decide the right size polypropylene scroll (or multiple options if more than one is required) for your system along with the correct motor, pedestal (indoor or weatherproof outdoor) and inverter to meet your project airflow requirements.
